

YOUR QA4 IS CAPABLE OF MORE

The QA4™ Mobile Surgery System is recognised throughout UK elective surgery as one of the most versatile single-platform solutions for patient transport, treatment and recovery. Used multiple times every day at over 580 UK sites...just not always to its true full potential.

With dedicated build options and accessories, in combination with supplementary patient positioning devices from Baxter, Reison, MediPlast and Trulife, your existing QA4™ can enable elective surgery across a wide range of procedures and a wider range of surgical specialities than perhaps you realise.

Help increase theatre utilisation, standardise your equipment and maximise the return on your investment.

Thinking about your QA4 — which specialities are they currently used for?

Bariatric surgery

Breast surgery

Emergency surgery

Endocrine surgery

ENT surgery

General surgery

Gynaecology

Neurology

Obstetric surgery

Ophthalmology

Oral & Maxillofacial

Orthopaedic elective

Orthopaedic trauma

Paediatric

Plastic surgery

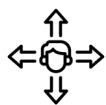

Spinal surgery

Urology

Vascular surgery

EXPAND THE CAPABILITY OF YOUR QA4

Orthopaedics: Knee Arthroscopy - Leg Section with Full Length Side Bar.
Shoulder Surgery - Beach Chair
Hip Surgery - HipFix™

Urology & Gynaecology: Retrograde Extension, Lithotomy Stirrups.

Upper Limb: Magna, Gardiner & Woodlands Arm & Hand Surgery Tables

ENT / Ophthalmics: Dual-articulating Headrests & Full Width Headrests

Theatre Workflow: Oxygen Delivery Bar, Foot Extensions, Push/Pull Bar, Mobile Accessory Stand, Side Rail Covers, Operating Table Accessories

ASK YOURSELF:

- Are you purchasing multiple specialist operating platforms?
- Would greater versatility improve theatre utilisation and throughput?
- Would the department team benefit from reducing or eliminating patient transfer?
- Have you explored using your QA4 for all of the procedures you provide?
- Are you gaining the maximum value from your QA4?

A review could be revealing....

Your regional account manager is an expert on the QA4 Mobile Surgery System – inviting yours to review current QA4 usage and explore the potential to increase its capability, improve theatre efficiency, reduce equipment duplication, standardise patient positioning and create a QA4 that is a more valuable investment, may prove beneficial. To you, to your team, to your patients.

One platform. More specialities. More procedures. Greater value.

Contact your regional account manager or Anetic Aid to arrange a QA4 Surgical Versatility review and discover how your QA4 can do so much more.
